24 February 2025

Dear Members of the Board,

I am writing to provide you with an update on our upcoming "Future Cities" exhibition and to request your input on several key initiatives.

Our curatorial team has secured commitments from leading architectural firms worldwide, including partnerships with studios in Sydney, Berlin, and Buenos Aires. The exhibition will showcase innovative urban planning solutions addressing climate resilience, social equity, and technological integration. Current projections indicate this will be our most ambitious exhibition to date, with an anticipated attendance of 50,000 visitors over its three-month run.

We have also received a matching grant opportunity from the Darwin Foundation for \$500,000, contingent upon our ability to raise an equal amount by January 15, 2025. Given the exhibition's scope and our ongoing building renovation project, I would like to schedule an emergency finance committee meeting next week to discuss fundraising strategies.

The building renovation project remains on schedule despite some unexpected challenges with the historic facade. Our contractors have developed an innovative solution that will preserve the original architectural elements while incorporating the necessary updates to our climate control systems. The projected completion date remains set for early February, well ahead of the "Future Cities" exhibition opening.

Additionally, I am pleased to report that our educational outreach program has exceeded its annual goals, reaching over 10,000 students from underserved communities. The success of this program has attracted attention from the Department of Education, which has expressed interest in expanding our partnership.

Please review the attached detailed budget and programming schedule at your earliest convenience. I would appreciate your feedback, particularly regarding the proposed opening gala scheduled for March 15, 2025.

Best Regards,

Kenny Satya
President
